

PROJECT PRESENTATION

WEB DESIGNING

- Designing is the process of collecting ideas, and aesthetically arranging and implementing them, guided by certain principles for specific purpose. Web design is a similar process of creation, with the intention of presenting the content on electronic web pages, which the end-users can access through the internet with the help of a web browser.

What do I Need to Learn in Web Design ?

- **HTML**

- *HTML is not a programming language it is markup language which is use for webpage document.*

- **CSS :**

- *CSS is the language we use to style an HTML document. CSS describes how HTML elements should be displayed.*

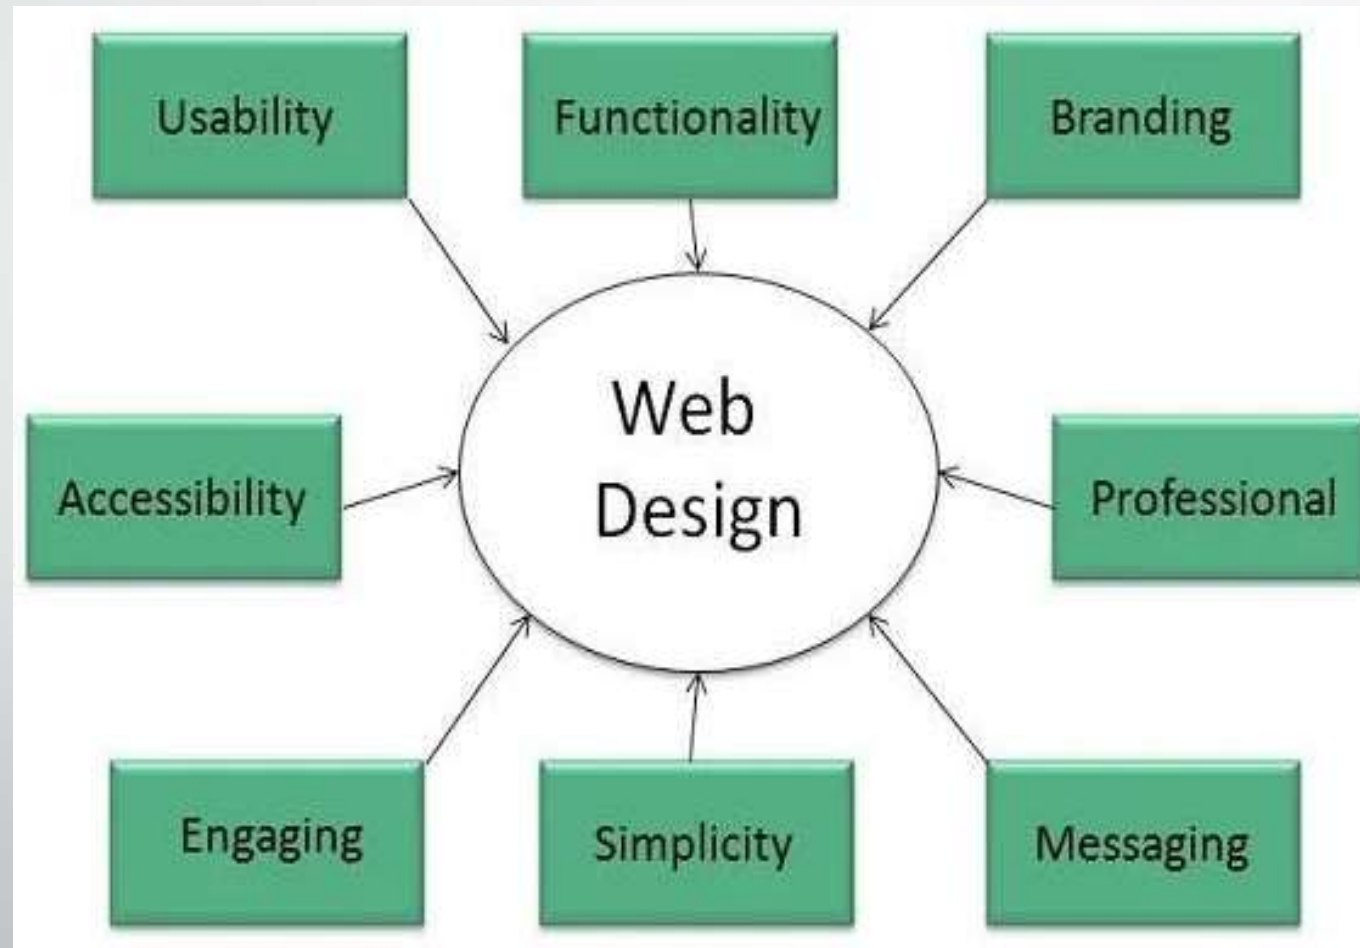

- **JAVASCRIPT :**

- Javascript is used add interactivity and behaviours to webpages.

- **RESPONSIVE DESIGN :**

- Designing your website so that is respond to your user environment based on screen size, platform and orientation.

Web Design

My Project

❖ **My Project Name : Company_Site :-**

A company site is an internet site which presents a company, an institution or an organization to all its audiences and not only to its customers or users.

A well-designed website can help you form a good impression on your prospective customers. It can also help you nurture your leads and get more conversions. But, more importantly. It provides good user experience and helps your website visitors access and navigate your website with ease.

Implementation

Pages :

1. Home page :

There is my home page of web site. That is main webpage of a website. The term may also refers to the start page shown in web browser when the website first open.

About Us Page :-

An about Us page is a section on a website that provides information about a company, organization, or individual. It is an opportunity to tell your brand's story, share your vision, history, values, and achievements, and introduce team members.
